RE: SGET

Dear Mr. Monin,

The Traffic Engineering Division has reviewed the submittal and considered the merits of the above referenced products. Fortunately, we have elected to approve these for use on Oklahoma State Highway projects and for inclusion on our APL. This decision was based on the following:

- Meets or exceeds ODOT Specification 623.
- Installation of such product(s) is in compliance with applicable sections of Oklahoma, Title 47.

The purchase of your products by the Department is subject to state procurement procedures. The approval of your products is no guarantee that they will be used on a construction/maintenance project. The approval is withdrawn if your products fail to perform according to the manufacturer's statement and the performance criteria.

If there are any future circumstances that may affect our decision (manufacturing or specification changes, etc.) please submit a Resubmission Request Form (TNPE-2) with any updated documentation. Any modification or misapplication of these products may result in ODOT removing approval.

This letter shall not be considered a product endorsement.

Thank you for your submission. If you have any questions or concerns, please contact our APL team at TrafficSubmittals@odot.org

Sincerely,

Creedence L. Divis
APL Manager
